

**Team id:** PNT2022TMID48827

**Title :** Fertilizer Recommendation System for Disease Prediction

### Project flow

To accomplish the above task, you must complete the below activities and tasks:

- ✚ Download the dataset.
- ✚ Classify the dataset into train and test sets.
- ✚ Add the neural network layers.
- ✚ Load the trained images and fit the model.
- ✚ Test the model.
- ✚ Save the model and its dependencies.
- ✚ Build a Web application using a flask that integrates with the model built.
